

Dispensing Factsheet: No Charge and Multi-Charge Items

Pharmacy teams can be presented with prescriptions for items which incur either a single charge, no charge, or multiple charges. Here we list some commonly encountered no charge and multiple charge items.

Multiple Prescription Charges

Multiple prescription charges are payable where on the same prescription:

- Different drugs, types of dressings or appliances; including those ordered with extra parts are supplied;
- Different formulations or presentations of the same drug or preparation are prescribed and supplied;
- Additional parts are supplied together with a complete set of apparatus or additional dressing(s) together with a dressing pack;
- More than one piece of elastic hosiery is prescribed and supplied (there is one charge for each anklet, knee cap, below knee, above knee or thigh stocking supplied).

Examples of Two Charge Items Including Combination Packs

Actonel Combi	Cyclo-progynova 2mg	Migraleve (combination pack)
Ametop 4% gel disp pack	Elleste Duet 1mg or 2mg	Pabrinex I/M High Potency 5ml + 2ml
Canesten Combi pessary & cream	Evorel Sequi patches	Pabrinex I/V High Potency 5ml + 5ml
Canesten Oral & Cream Duo	Femoston 1/10mg or 2/10mg	Tridestra
Clinorette	FemSeven Sequi patches	Trisequens

No Prescription Charge

No charge is payable for contraceptive substances and listed contraceptive appliances for women (as referenced in Part XVI Clause 10 of the Drug Tariff) prescribed on FP10 or any of its variants. These items do not need to be annotated for contraceptive use by the prescriber and a prescription charge should not be levied for these products.

Prescriptions for any other drug not referenced in Part XVI Clause 10 of the Drug Tariff which is to be used for contraceptive purposes must be annotated by the prescriber with 'CC', 'OC' or the female symbol ♀. In the absence of such an endorsement by the prescriber the normal prescription charge will apply to that item; where the patient does not have any valid exemption.

The following list contains commonly dispensed products which incur either no prescription charge or multiple prescription charges.
